

EMOTIONAL MATURITY OF B. Ed TRAINEES

Name of the Student : JUBNA P. PULIKKAL

Name of Supervising Teacher : Dr. BINDHU C. M.

Year of the Study : 2008

OBJECTIVES

- To identify the level of emotional maturity
- To study whether there exist any significant difference in the level of Emotional Maturity of B. Ed trainees based on Sex, faculty and type of management

METHODOLOGY

Method Used : Survey Method

Sample : 500 Student Teachers

Tools : Scale of emotional maturity (Bindhu & Jubna, 2008)

Statistical Techniques : ANOVA

RESULT

- The level of emotional maturity of teacher students on basis of gender, faculty and type of management is medium or normal.
- There is no significant difference in emotional maturity of male and female trainees except in one component, emotional independence. Male students are more superior to females in case of emotional independence.

KEY WORDS: Emotional Maturity, B. Ed trainees
