

RELATIONSHIP OF MATERIAL BEHAVIOUR WITH BULLYING AND VICTIMIZATION
OF ADOLESCENTS

Name of student : SREEJA M S

Name of supervising teacher : Dr P REKHA

Year of the study : 2009

OBJECTIVES

To find out the relationship of material responsiveness with bullying and victimization of their adolescent children for the total sample and relevant subsamples based on gender and locale.

METHODOLOGY

Method used : qualitative study.

Sample : Total of 674 students of standard XII

Tools : Bullying and victimization inventory to measure bullying and victimization of Adolescents, Inventory on Perceived Material Behavior to measure the behavior of the mother as perceived by the students.

Statistical Techniques : Preliminary analysis, Pearson's product moment coefficient of correlation (Garret, 1981), Test of significance of difference between two is (Garret, 1981).

RESULT

Significance difference does not exist in the relationship of material behavior with bullying and victimization of adolescents for the subsample gender and locale.

KEY TERMS: Material behavior, Bullying and Victimization of Adolescents.
