

EFFECT OF EDUCATIONAL ASPIRATION ON SELF ESTEEM OF HIGHER SECONDARY
SCHOOL STUDENTS

Name of student : NAVAMI P N
Name of supervising teacher : Dr HASSAN KOYA M.P
Year of study : 2010

OBJECTIVES

- To find out whether there is any significant difference in Educational Aspiration of higher secondary school students in the relevant sub samples based on,gender locale and type of school management
- To find out whether there is any significant difference in Self Esteem of higher secondary school students in the relevant sub samples based on gender locale and type of school management
- To find out the effect of Educational Aspiration on Self Esteem of higher secondary school students for the total sample and sub samples based on, gender locale and type of school management.

METHODOLOGY

Method used : Survey method

Sample : 730 higher secondary students of Malappuram and Kozhikode districts of Kerala

Tool :Educational Aspiration Scale (Navami & Koya, 2010) *h*)Self Esteem Inventory (Koya & Beegam, 2007)

Statistical techniques : Test of Significance difference between Means for large independent sample, One Way ANOVA

RESULT

The main effect of Educational Aspiration of Self Esteem was found not significant for the total sample and all the sub samples based on gender, locale, and type of management. Higher educational aspiration is associated with girls and government school students

KEY TERMS :educational aspiration, self esteem, higher secondary students
