

AWARENESS ON ENERGY CONSERVATION AMONG HIGHER SECONDARY  
SCHOOL STUDENTS

Name of the student : BADARUNNISSA. PARANGODATH

Name of the supervising teacher : Mr. ABDUL BASHEER. V

Year of the study : 2013

**OBJECTIVES**

- To find out the extent of awareness on energy conservation in the total sample and in the relevant subsamples.
- To find out whether there exists significant difference in the mean scores of awareness on energy conservation and its components among the relevant subsamples.

**METHODOLOGY**

**Method used** : Survey method

**Sample** : 1000 Higher secondary school students

**Tool** : Awareness test on energy conservation

**Statistical Techniques:** Percentile analysis, Test of significance of difference between means for large independent sample, One way ANOVA

**RESULT**

The mean score of awareness on energy conservation among higher secondary school students is 37.77 which is just above the half of the total score, which could be improved a lot.

**KEY TERMS** : Energy conservation, awareness, higher secondary school students.
