

INFLUENCE OF SOCIAL COMPETENCE ON THE INDISCIPLINE BEHAVIOUR AMONG  
HIGHER SECONDARY SCHOOL STUDENTS

Name of the student : RESHMA.T.S  
Name of the Supervising Teacher : Dr. MANOJ PRAVEEN .G  
Year of study : 2013

**OBJECTIVE**

- To find out the extent of indiscipline among higher secondary school students.
- To find out whether there is any effect of social competence on indiscipline behavior among higher secondary school students

**METHODOLOGY**

**Method** : Survey Method  
**Sample** : 400 higher secondary students  
**Tools** : Social competence scale  
**Statistical techniques** : Percentiles, Test of significance of Mean difference for large independent sample, Pearson's product moment correlation, One- way ANOVA

**RESULT**

There is significant difference between male and female students and males are having higher indiscipline than female students. There is a significant difference of indiscipline behavior on the subject of study .The two variables are negatively related. That is, an increase in indiscipline behavior may result for the decrease in social competence

**KEY TERMS:** Indiscipline behavior, social competence.
