8. What is the use of calculating Co-efficient of correlation ?
9. Calculate mean and median of the following data :  
20, 7, 22, 8, 12, 11, 9, 8, 10, 5, 6, 13, 16, 17.
10. Distinguish between criterion referenced and norm referenced evaluation ?

(10 × 2 = 20 marks)

**Part B**

*Answer any ten questions.*

*Each question carries 4 marks.*

11. Prepare a model of an analytic rubric to evaluate an assignment on any topic.
12. Distinguish between assessment for learning and assessment of learning.
13. Explain the importance of statistics in education.
14. Explain any two principles of assessment in learning.

**Turn over**

15. Describe the scope and nature of a diagnostic test.
16. Represent the following data graphically with the help of a Pie diagram :

Grade	A + grade	A grade	B + grade	B grade	C + grade
Number of students	10	20	25	35	10

17. Give brief descriptions of any two qualities of a good test.
18. Differentiate between frequency polygon and frequency curve.
19. Calculate median of the following data :

Scores	Frequency	Cumulative Frequency
25- 29	1	1
30-34	2	3
35-39	3	6
40-44	4	10
45-49	10	20
50-54	12	32
55-59	10	42
60-64	7	49
65-69	6	55
70-74	5	60

20. What is question wise analysis ? Mention its significance.
21. Write short note on self reporting techniques, its merits and demerits.
22. Distinguish between inventory and attitude scale.

(10 × 4 = 40 marks)

### Part C

*Answer any two questions.*

*Each question carries 10 marks.*

23. Which are the important measures of dispersion ? Write the advantages and disadvantages of each.
24. Explain different ways of representing the data graphically. Give the merits and demerits of each.
25. Explain current practices at secondary school level and the major issues related with the same.

(2 × 10 = 20 marks)
