

AN ANALYSIS OF THE PRESENT STATUS OF ANGANWADIS IN KANNUR
DISTRICT

Name of student : JEEJA VELLUVAKKANDY.

Name of supervising Teacher : Dr. MANOJ PRAVEEN

Year of study : 1999

OBJECTIVES

To analyze the present status of Anganwadis with respect to the traits prescribed by ICDS.

METHODOLOGY

Method used : Survey method

Sample : 243 Anganwadis in Kannur District.

Tool : Questionnaire.

Statistical Techniques : Percentage Analysis.

RESULT

- The present study reveals that room facilities are very inadequate in Anganwadis.
- The study also reveals that 34 percentage dropouts have taken place from Anganwadis..
- The study also reveals that there are Anganwadis workers who have not get the job training so far.
- From the study it was also seen that there are no separate activities for physically handicapped children. Even with the high degree of health care programme in Anganwadis, those children are neglected care should be fall on this fact.
- Most of the Anganwadis worker agree with the high work load on them. The children will be cared more if their workload is reduced and they can stress more on pre-school activities.

KEY TERMS : Anganwadis.
