

A STUDY OF THE RELATIONSHIP BETWEEN MENTAL HEALTH AND
ATTITUDE TOWARDS PHYSICS OF SECONDARY SCHOOL PUPILS OF
KOZHIKODE DISTRICT

Name of student : SANMDHYA.K
Name of supervising Teacher : ABDUSALAM.C
Year of study :2000

OBJECTIVES

To find whether there exist a significant difference in the relationship between mental health and attitude towards physics of secondary school pupils of Kozhikode district.

METHODOLOGY

Method used : Survey method

Sample : 430 IXth standard of Kozhikode district.

Tool : Scale of Attitude to physics. Mental health status scale.

Statistical Techniques : Pearsons product moment co-efficient of correlation.

Test of significance of difference between two correlation coefficients.

RESULT

The study reveals that total sample and all the sub samples showed positive significant correlation between Mental and attitude towards physics

KEY TERMS : Mental Health, Attitude, Physics, Secondary School pupils.
